

# GENERAL LOCKING DEVICES

Ceildoor Products Ltd Planetary House Planetary Road Willenhall Wolverhampton WV13 3SW

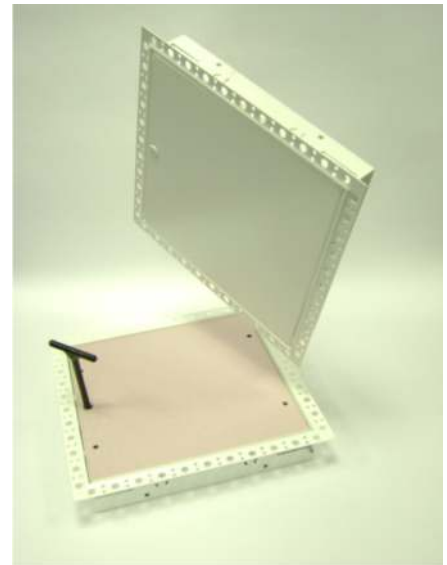

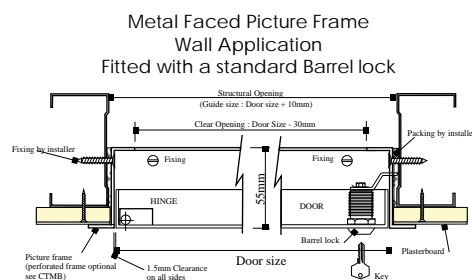

## Locking Types

Under normal circumstances and requirements Ceildoor access hatches are fitted with budget locks as standard.

Other locking devices can be fitted to our full range of units, to provide differing levels of security and weather and water and dust proofing. Below is a range of locking devices which can be incorporated into our hatches to order. Please just quote the product code below at the end of one of our access hatch codes and our sales department will be happy to confirm prices to cover the lock option type required. The sectional detail below shows a standard barrel lock.

Key retaining Barrel lock located into metal faced picture frame

This lock system is designed to be used when the client prefers a conventional key type lock as a preference. It is recommended that all locks on a quantity order are keyed all alike, so the same key can open various hatches supplied onto the same contract. This lock is a secure form of lock however for anti-tamper preferences please see our anti-tamper type. For further information please call 01902 733645.
